TRANG M. NGUYEN

(319)333-6995 ⋄ https://nguyentr17.github.io
Amherst, MA 01002 ⋄ tramnguyen@umass.edu

RESEARCH INTERESTS

Multimodal Machine Learning (ML), Explainable and Adaptable ML, ML model drift.

EDUCATION

University of Massachusetts Amherst, Amherst MA *Expected May 2028*
M.S./Ph.D in Computer Science (GPA: 4.0)

Grinnell College, Grinnell IA *May 2017*
B.A in Mathematics & Statistics (GPA: 3.9)

HONORS & AWARDS

2023 Honorable Mention, Ford Foundation Predoctoral Fellowship
2023 Lori A. Clarke Scholarship, University of Massachusetts Amherst
2023 Finalist, Three Minute Thesis Competition
2017 Phi Beta Kappa, Academic Honor Society
2016 First Place, National Undergraduate Project Competition (American Statistics Association)
2015 Summer Business Scholars Program Full Scholarship, University of Chicago

WORK EXPERIENCE

Lead DataOps Engineer 2019 – 2022
Tamr Inc. *Cambridge, MA*

· Designed, implemented, and productionized data pipelines, integrating machine learning solutions in the data architecture ecosystem.
· Led several human-in-the-loop machine learning projects in a variety of domains including finance (e.g. Capital One) and biopharma (e.g. GSK).

Data Scientist Assistant 2017 – 2019
American Institutes for Research *Washington, D.C.*

· Co-authored two published R packages (EdSurvey and WeMix) that connect to big survey databases and analyze complex survey data with imputation variance and multilevel weights.
· Implemented deep learning algorithms to extract behavioral features from videos, and natural language processing to extract features from video transcripts for classroom analytics.

RESEARCH EXPERIENCE

University of Massachusetts Amherst, Research Assistant 2022 – Present
PI: Prof. Madalina Fiterau (Information Fusion Lab) *Amherst, MA*

· Design theoretical frameworks to predict optimal fusion configurations given a multimodal dataset.
· Study different fusion mechanism with the goal to design better fusion mechanism that can capture various types of relationship among data modalities.

Harvard University Medical School, Independent Researcher 2021 - 2022
PI: Dr. Oleg Pianykh *Boston, MA*

· Designed and implemented experiments to investigate the phenomenon of temporal ML model degradation in healthcare and non-healthcare settings.

PUBLICATIONS

* All authors are first co-authors.

TECHNICAL STRENGTHS

Knowledge	Machine Learning, Network Analysis, Survey Methodology, Experimental Design
Programming	Python, Java, R, SQL (Advanced), Javascript (Intermediate), C (Basic)
Languages	English (fluent), Vietnamese (fluent)
Others	Software development, Database (Advanced), Cloud Computing (Intermediate)

SELECTED ONGOING / UNPUBLISHED PROJECTS

Studying the Conflict Mechanism in Vision-Language Models Jan 2025 - Present

- Quantify the model's internal awareness of modality conflict
- Decompose conflict detection and resolution mechanism in VLMs.
- Paper on the results of the pilot study was accepted at the Actionable Interpretability ICML 2025 Workshop.

Studying the Priming Effect of Visual Large Language Models Jun - Sep 2024

- Investigated the mechanism behind the priming effect phenomenon in which Visual Large Language Models are primed to perceive a happy face as sad using in-context prompts.
- Poster was presented at New England Computer Vision (NECV) Workshop 2024.

Analyzing Eating Disorders through Social Media Anecdotes Feb - May 2023

- Analyzed different triggers and recovery patterns of people who suffer from eating disorders and self-report on Reddit from 2020 to 2023 using topic modeling and large language models (GPT-3).

Informal Network Analysis of Staff in a College Sep - Dec 2016

- Designed survey to collect data on informal communications among staff and proposed a cost-effective method to group staff in an organization using network analysis.
- Delivered a white paper and web application to the Human Resources Department of Grinnell College.

SERVICE & OUTREACH

2023 - 2024	Advisor for Voices of Data Science
2022 – 2023	Co-Chair for Voices of Data Science Conference
2020 - 2021	Data Science Talent Fellow at Open Avenues Foundation
